

Copy Services

High Speed Copying/Digital Printing

We utilize a combination of top of the line high speed copiers and digital printers to produce any project that you may dream up within your deadlines with the highest possible quality. Our digital output is at **400** or **600** dpi. **FTP** your files to us.

We can electronically store your original project so that you can order only what you need now, update or make changes later or just call back to order more whenever you are ready. We can also auto-insert color copies, tabs and of course bind your final product in many different ways.

Color Copying

Our Color Copier is extremely versatile. You are not limited to standard photographs or your PhotoShop creation. We have copied many unusual objects such as a gold necklace, a blanket, an ornate picture frame, and a commemorative bottle. Get creative. Bring it in and we'll try it!

You can also submit more complex endeavors. Prepare your project in color and we'll produce it (from your CD's, zip disk or file that you upload to our **FTP** site) with our digital color copier/printer. Our color copier offers a wide variety of features to meet all of your color copying and printing needs, including double-sided imaging, output up to 11x17, reductions and enlargements, electronic file printing and output on a variety stocks, including glossy paper and 90# index.

Talk to our Manager, Michael about the infinite possibilities we can offer.
